Grade 8 TextBook. The new Curriculum Framework for Ethiopian primary level (Grade 1 to Grade 8), consists of the following major parts: the vision, principles of curriculum, key competencies, overarching issues, re-primary education curriculum, primary education curriculum, and assessment and promotion.

At seventh grade, your child will become very busy with school lessons and extra-curricular activities. You can help your child breeze through his lessons on cell biology by giving him a copy of this educational resource. This book combines texts and pictures to make learning as pleasant and effective as possible. Go ahead and grab a copy today.

Your child needs an educational book that supports his/her quest for academic excellence but with an irresistible appeal that makes it ideal for home study. This science book discusses the cell theory, which dictates that cells are the basic unit of life. Explore this theory further by going over the pages of this biology book. Get a copy today.

Living things are classified into domains and kingdoms. But because life on Earth is too varied and complex, these two classifications are further broken down into more specific subcategories dubbed as family, genus and species. This science book will cover the process of life classification. It will also touch on dichotomous keys, which allow students to classify organisms based on their physical characteristics.

Learn more information about Earth ' s most sophisticated machines - the human body. Encourage your child to seek further knowledge beyond the classroom. This science book can be used to review the organs and organ systems. But if you buy a copy ahead, your child can use it as advance reading material to improve grades in school. Grab a copy today.

It ' s the revolutionary world history study guide just for middle school students from the brains behind Brain Quest. Everything You Need to Ace World History . . . kicks off with the Paleolithic Era and transports the reader to ancient civilizations—from Africa and beyond; the middle ages across the world; the Renaissance; the age of exploration and colonialism, revolutions, and the modern world and the wars and movements that shaped it. The BIG FAT NOTEBOOK™ series is built on a simple and irresistible conceit—borrowing the notes from the smartest kid in class. There are five books in all, and each is the only one book you need for each main subject taught in middle school: Math, Science, American History, English, and World History. Inside the reader will find every subject ' s key concepts, easily digested and summarized: Critical ideas highlighted in marker colors. Definitions explained. Doodles that illuminate tricky concepts. Mnemonics for a memorable shortcut. And quizzes to recap it all. The BIG FAT NOTEBOOKS meet Common Core State Standards, Next Generation Science Standards, and state history standards, and are vetted by National and State Teacher of the Year Award —winning teachers. They make learning fun, and are the perfect next step for every kid who grew up on Brain Quest.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand.We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Learn to identify and describe the five major kingdoms of Monera, Protista, Fungi, Plantae and Animalia. Gain enough knowledge to correctly explain the differences and similarities of these five major kingdoms, as well as why and how they were divided this way. With well-placed images and complementing texts, this book is a wonderful read! Go ahead and grab a copy today.

The Focus On Middle School Biology Student Textbook gives young students a strong foundation in the scientific discipline of biology. Students will learn about taxonomy, cell structure and types of cells, photosynthesis, plant structure and life cycles, single-celled organisms and how they move and eat, the life cycle of the frog, the life cycle of the butterfly, and ecosystems. The Focus On Middle School Biology Student Textbook contains 10 full-color chapters. Grades 5-8.
