Anatomy: 1800 Multiple Choice Questions contains 1,800 multiple choice questions related to anatomy. The questions are supported by illustrations and arranged into nine sections: Upper Limb, Lower Limb, Thorax, Abdomen, Pelvis and Perineum, Head and Neck, Nervous System, Histology, and Embryology. In the Histology section, the questions in each of the six standard formats are arranged in the same sequence, as follows: the Cell; the Tissues (commencing with the Epithelia and ending with Nervous Tissue); and the Systems (commencing with the Cardiovascular and ending with the Reproductive). Readers will encounter questions dealing with the spine of the scapula, the vein that pierces the clavicular fascia, branch of the axillary artery, and the quadriceps femoris muscle. Other topics include muscle pair inserted into iliotibial tract, bony prominences on which you kneel, muscle that flexes hip and knee, and the chromosomal formula of the oocyte at ovulation. This text also discusses the rate of regeneration of peripheral nerves following injury; structures that occupy the carotid sheath; and the location of sphincter urethrae. This book will be extremely valuable to students and teachers of anatomy.

This handy self-assessment paperback contains over 500 multiple-choice-questions to help readers evaluate their understanding of introductory level human biology. Fully indexed, with helpful explanations given throughout the answer section, the book will be ideal for students of nursing and allied health professions, biomedical science, operating department practice, and complementary therapy and massage therapy. Over 500 MCQs support revision and learning Ideal for individual use or in an informal group setting Perfect prior to exams and/or for use during 'placement breaks' or 'on the move'!

Dr Rani Kumar MBBS, MS, FAMS is Retired Professor & Head of Anatomy and Dean at AIIMS New Delhi. She has a total of 40 years of Anatomy teaching experience at AIIMS at UG and PG levels. She was awarded Distinguished Teachers' Award by Delhi medical Association in 1992 and Best Research Paper on Experimental Embryology by Anatomical Society of India. She was also awarded Fogarty International Fellowship at National Institute of Health; Bethesda, Maryland, USA in 1980 for one year .She has published many scientific papers in international and national journals of repute.

This second edition provides 2400 multiple choice questions on human anatomy and physiology, and some physical science, separated into 40 categories. The answer to each question is accompanied by an explanation. Each category has an introduction to set the scene for the questions to come. However, not all possible information is provided within these Introductions, so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The questions have been used in end-of-semester examinations for undergraduate anatomy and physiology courses and as such reflect the focus of these particular courses and are pitched at this level to challenge students that are beginning their training in anatomy and physiology. The question and answer combinations are intended for use by teachers, to select questions for their next examinations, and by students, when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition and dietetics, health sciences, exercise science, and students taking an anatomy and physiology course as an elective.
