Tony Attwood's guide will assist parents and professionals with the identification, treatment and care of both children and adults with Asperger's Syndrome. The book provides a description and analysis of the unusual characteristics of the syndrome and practical strategies to reduce those that are most conspicuous or debilitating. Beginning with a chapter on diagnosis, including an assessment test, the book covers all aspects of the syndrome from language to social behaviour and motor clumsiness, concluding with a chapter based on the questions most frequently asked by those who come into contact with individuals with this syndrome. Covering the available literature in full, this guide brings together the most relevant and useful information on Asperger's Syndrome, incorporating case studies from the author's own practical experience as a Clinical Psychologist, with examples of, and numerous quotations from people with Asperger's Syndrome.

World-renowned experts join those with Asperger's Syndrome to resolve issues that girls and women face every day!

Addresses questions on topics such as seeking or disclosing an autism diagnosis; anxiety, depression, and meltdowns; getting and keeping a job; forming and keeping friendships and relationships. The authors' goal is to enable people to thrive with autism.

If you only buy one book to improve your life this year, make it this one. Temple Grandin, Liane Holliday Willey, Anita Lesko, Stephen M. Shore, and many other Aspie mentors, offer their personal guidance on coping with the daily stressors that Aspies have identified as being the most significant, in order of urgency - anxiety, self-esteem, change, meltdowns, depression, friendship, love, and much, much more. Based on years of personal experience, this book is packed with advice from Aspie mentors who have all been there and done that! World expert Dr. Tony Attwood rounds up each chapter with professional analysis and extensive recommendations. He includes essential information on destructive strategies that may look attractive, but that have counter-productive effects. Including full color artwork from Aspie artists showing visually how they interpret each stressor, this is THE inspirational guide to life for young adults, the newly diagnosed, and as a life-long reference for anyone on the spectrum - written by Aspies for Aspies.

Children and adolescents with Autism Spectrum Disorders (ASD) are often not instinctive and intuitive in expressing their liking or love for someone, or in understanding that family members, friends and others need affection. Expressing affection to teachers, other close professionals, or family friends, can be even more challenging. This book, by the leading experts in the field, provides a carefully constructed CBT programme for professionals to help boys and girls with an ASD to feel confident recognising, expressing and enjoying affection. The activities will help the young person identify their own and others' comfort and enjoyment range for gestures, actions and words of affection. They will also learn the variety of appropriate ways they can express liking or loving someone, helping them to strengthen friendships and relationships. This book will be an invaluable resource for professionals supporting a child with an ASD.

The Stress and Anger Management Program (STAMP) uses a cognitive behavioral approach to encourage children who suffer from mood difficulties to explore and control their emotions. This practical manual outlines a dynamic and effective 9-session program designed specifically for young children with high-functioning autism or Asperger's syndrome.

Winner of a 2008 Teachers' Choice Award! Many children, especially those with developmental delays, have trouble understanding or expressing their feelings. The result can be difficulty with anger management. Listing possible responses to situations - and the likely outcome of each one - allows the child to make informed decisions about which responses to choose (walking away vs. hitting). This book provides a guide for caregivers and then the workbook portion asks children to identify situations that trigger their anger and find appropriate ways to respond. Helpful topics include: Overview of the Exploring Feelings Program Introduction to Cognitive Behaviour Therapy Modifications to Conventional Cognitive Behaviour Therapy Affective Education Cognitive Restructuring Comic Strip Conversations The Emotional Toolbox Additional Tools for the Toolbox Social Stories Research Evidence on the Effectiveness of Exploring Feelings

For the families who have contributed to this book, living with autism spectrum disorders has been a journey of self-discovery. With honesty and humor, they describe the ways autism has affected their daily lives, the challenges they have faced and the approaches they have found beneficial. They share their practical and original strategies for dealing with issues such as helping children to develop empathy and humor, developing and maintaining friendships and explaining their autism spectrum disorders to other people. This book will be a source of advice and inspiration for families of children with autism and the professionals who work with them. It is practical, realistic and positive - autism is seen as something to be understood and celebrated. As 11-year-old Glen states in the Appendix, written by some of the children with autism featured in the book: \"I like myself and consider my difference something positive.\"

For people with ASDs, depression is common, and has particular features and causes. This outstanding book provides a comprehensive review of these aspects, and an effective self-help guide for anyone with an autism spectrum disorder (ASD) affected by depression. Written by the leading experts in the field, the book explains and describes depression, the forms it can take, and how it looks and feels for a person on the autism spectrum. The authors draw on the latest thinking and research to suggest strategies for coping with the effects of depression and provide a complete step-by-step CBT self-help programme, designed specifically for individuals with ASDs. The programme helps increase self-awareness, including identifying personal triggers, and provides the tools to combat depression.
