satisfying business objectives. Realistic examples, mini-cases, case applications, and thought-provoking review material with projects promote active learning. This text is beneficial to the business professional interested in a basic understanding of management information systems today.

Real-World Lessons + Excellent Support
Whatever you do in business, you will experience MIS. What kind of experience will you have with MIS? Will you understand how businesses use--and need--information systems to accomplish their goals and objectives, and develop their competitive strategy? By presenting real-world cases Experiencing MIS helps you to experience MIS right now at university, where you can exercise your enquiring mind and unlock the potential of information systems for business. With an approachable, easy-to-use and sometimes humorous

attitude this text shows you how to become a better problem-solver and a valued business professional.

As the elderly population increases, the importance of creating sophisticated information support to humans with limited sensing performance has also grown. This book discusses human and artificial sensing in conjunction with human perception capabilities (auditory, taste, smell, vision, and touch). It also discusses the fusion of this sensing information to find answers to questions such as how we can increase our human "fuzzy" decision capability (perception). The book presents intelligent new technologies that can enhance the natural sensing, perception, and mobility abilities of humans, allowing them to have healthier, more productive, safer lives.
