What causes some people to stand in solidarity with those from other races, religions, or nationalities, even when that solidarity does not seem to benefit the individual or their group? Seeing Us in Them examines outgroup empathy as a powerful predisposition in politics that pushes individuals to see past social divisions and work together in complex, multicultural societies. It also reveals racial/ethnic intergroup differences in this predisposition, rooted in early patterns of socialization and collective memory. Outgroup empathy explains why African Americans vehemently oppose the border wall and profiling of Arabs, why Latinos are welcoming of Syrian refugees and support humanitarian assistance, why some white Americans march in support of Black Lives Matter through a pandemic, and even why many British citizens oppose Brexit. Outgroup empathy is not naïve; rather it is a rational and necessary force that helps build trust and maintain stable democratic norms of compromise and reciprocity.

The development of online learning environments has enhanced the availability of educational opportunities for students. By implementing effective curriculum strategies, this ensures proper quality and instruction in online settings. The Handbook of Research on Writing and Composing in the Age of MOOCs is a critical reference source that overviews the current state of larger scale online courses and the latest competencies for teaching writing online. Featuring comprehensive coverage across a range of perspectives on teaching in virtual classrooms, such as MOOC delivery models, digital participation, and user-centered instructional design, this book is ideal for educators, professionals, practitioners, academics, and researchers interested in the latest material on writing and composition strategies for online classrooms.

What happens to migrants after they are deported from the United States and dropped off at the Mexican border, often hundreds if not thousands of miles from their hometowns? In this eye-opening work, Jeremy Slack foregrounds the voices and experiences of Mexican deportees, who frequently become targets of extreme forms of violence, including migrant massacres, upon their return to Mexico. Navigating the complex world of the border, Slack investigates how the high-profile drug war has led to more than two hundred thousand deaths in Mexico, and how many deportees, stranded and vulnerable in unfamiliar cities, have become fodder for drug cartel struggles. Like no other book before it, *Deported to Death* reshapes debates on the long-term impact of border enforcement and illustrates the complex decisions migrants must make about whether to attempt the return to an often dangerous life in Mexico or face increasingly harsh punishment in the United States.

Initially, research in border studies relied mainly on generalizations from cases in the US-Mexico borderlands before subsequently burgeoning in Europe. *Border Politics in a Global Era* seeks to expand the study further to include the post-colonial South in response to the major challenge of interdisciplinary border studies: to explore borderlands in many contexts, with and across a variety of states, including the so-called developing, post-colonial states. Culled from decades of firsthand observations of borders from around the world and written with a critical and gender lens, the text is framed with attention to history, geography, and the power of films and travelogues to represent people as “others.” Professor Kathleen Staudt advances border concepts, categories, and theories to focus on trade, migration, and security highlighting the importance of states, their length of time since independence, and border bureaucrats’ discretionary practices. Drawing on her Border Inequalities Database for a global perspective, Staudt calls for reducing inequalities and building institutions in the common grounds of borderlands. The book features maps and other visuals with lists of links at the close of most chapters. Broadly comparative in nature, *Border Politics in a Global Era* will appeal not only to students of border studies; it will also stimulate attention in comparative politics, international studies, and political geography.

This book provides a comprehensive and interdisciplinary examination of dual language education for Latina/o English language learners (ELLs) in the United States, with a particular focus on the state of Texas and the U.S.-Mexico border. The book is broken into three parts. Part I examines how Latina/o ELLs have been historically underserved in public schools and how this has contributed to numerous educational inequities. Part II examines bilingualism, biliteracy, and dual language education as an effective model for addressing the inequities identified in Part I. Part III examines research on dual language education in a large urban school district, a high-performing elementary school that serves a high proportion of ELLs along the Texas-Mexico border, and best practices for principals and teachers. This volume explores the potential and realities of dual language education from a historical and social justice lens. Most importantly, the book shows how successful programs and schools need to address and align many related aspects in order to best serve

emergent bilingual Latino/as: from preparing teachers and administrators, to understanding assessment and the impacts of financial inequities on bilingual learners. Peter Sayer, The Ohio State University, USA

Commodities: Markets, Performance, and Strategies provides a comprehensive view of commodity markets by describing and analyzing historical commodity performance, vehicles for investing in commodities, portfolio strategies, and current topics. It begins with the basics of commodity markets and various investment vehicles.
