NOTE - The Lippert Electric Rear Stabilizer Jack is designed to operate as a negative ground system. A negative ground system utilizes the chassis frame as a ground and an independent ground wire back to battery is necessary (see page 9 for wiring diagram). It is important that the electrical components have good wire to chassis contact. Electric Stabilizer Jacks by Lippert Description After a long trip, cranking manual scissor jacks can be a long and strenuous process.

There are a couple potential reasons why the back Lippert Power Jack # LC298707 on your trailer won't extend or retract even with the motor running. It's possible that it may have been over-extended or something internally has been stripped or bent. Try using the manual crank on the jack to see if it's able to operate in this manner.
