Evidence-based care is a well established principle in contemporary healthcare and a world wide health care movement. However, despite the emphasis on promoting evidence-based or effective care without the unnecessary use of technologies and drugs, intervention rates in childbirth are rising rapidly. Evidence-based Care for Normal Labour and Birth brings to light much of the evidence around what works best for normal birth which has, until now, remained largely hidden and ignored by maternity care professionals. Beginning with the decision about where to have a baby, through all the phases of labour to the immediate post-birth period, it systematically details research and other evidence sources that endorse a low intervention approach. The book: highlights where the evidence is compelling discusses its application where women question its relevance to them and where the practitioner's expertise leads them to challenge it gives background and context before discussing the research to date includes questions for reflection and practice recommendations generated from the evidence. Using research data, Evidence-based Care for Normal Labour and Birth critiques institutionalised, scientifically managed birth and endorses a more humane midwifery-led model. Packed with up-to-date and relevant information, this controversial book will help all students, practising midwives and doulas keep abreast of the evidence surrounding normal birth and ensure their practice takes full advantage of it.

Describes the story of a group of people from the Philippines who were transported to Coney Island in 1905 to be portrayed as "headhunting, dog-eating savages" in a Luna Park freak show.

Zen master Daito (1282-1337) played a leading role in the transmission of Zen (Ch'an) from China to Japan. He founded Daitokuji, a major monastery that has been influential for centuries, and he provided interpretations of Chinese texts. Daito's traditional biography is full of vivid episodes, including his years among the beggars of Kyoto and ending with his dramatic death in the meditation posture. Despite his importance, however, Daito has remained virtually unknown in the West. With the publication of Eloquent Zen Kenneth Kraft offers the first comprehensive account of the life and teachings of one of the greatest of Japan's Zen masters. Dr. Kraft begins with the foundations of medieval Japanese Zen. He shows that Daito's predecessors were concerned with clarifying the essentials of Zen as it began to take root in Japan. During this formative phase, the Zen pioneers embraced varied conceptions of enlightenment and divergent notions of authenticity. Kraft places Daito's contributions within this context, offering new insights about early Japanese Zen and about Zen itself. Throughout this study, Kraft looks closely at the complex role of language in Zen--a tradition supposedly distrustful of words. Daito wrote haiku-like poetry, participated in brilliant dialogues, and delivered powerful sermons. His virtuosity in articulating the way of Zen, "beyond words, beyond silence," is nowhere more apparent than in his use of the capping phrase, an interpretive and commentarial device unique to Zen. Analyzing Daito's use of this device, Kraft elucidates the significance of the literary and aesthetic dimensions of the Zen tradition. Eloquent Zen includes valuable translations of Daito's poetry and other writings. Illustrations include three classic portraits of Daito and rare examples of his calligraphy. This lucid and engaging study will interest scholars and nonspecialists interested in Zen, Japanese culture, and Asian philosophy, poetry, and related fields.

Spanning several decades and three continents, Modoc is one of the most amazing true animal stories ever told. Raised together in a small German circus town, a boy and an elephant formed a bond that would last their entire lives, and would be tested time and again; through a near-fatal shipwreck in the Indian Ocean, an apprenticeship with the legendary Mahout elephant trainers in the Indian teak forests, and their eventual rise to circus stardom in 1940s New York City. Modoc is a captivating true story of loyalty, friendship, and high adventure, to be treasured by animal lovers everywhere.

How can we learn from a multicultural society if we don't know how to recognise it? The contemporary city is more than ever a space for the intense convergence of diverse individuals who shift in and out of its urban terrains. The city street is perhaps the most prosaic of the city's public parts, allowing us a view of the very ordinary practices of life and livelihoods. By attending to the expressions of conviviality and contestation, *City, Street and Citizen* offers an alternative notion of "multiculturalism" away from the ideological frame of nation, and away from the moral imperative of community. This book offers to the reader an account of the lived realities of allegiance, participation and belonging from the base of a multi-ethnic street in south London. *City, Street and Citizen* focuses on the question of whether local life is significant for how individuals develop skills to live with urban change and cultural and ethnic diversity. To animate this question, Hall has turned to a city street and its dimensions of regularity and propinquity to explore interactions in the small shop spaces along the Walworth Road. The city street constitutes exchange, and as such it provides us with a useful space to consider the broader social and political significance of contact in the day-to-day life of multicultural cities. Grounded in an ethnographic approach, this book will be of interest to academics and students in the fields of sociology, global urbanisation, migration and ethnicity as well as being relevant to politicians, policy makers, urban designers and architects involved in cultural diversity, public space and street based economies.
