I came across this article out of Michigan State University, about the issue of teaching intro physics to life science majors. I find it rather interesting (amusing?) that this is still an issue being discussed at many large universities when smaller universities and

Physics and Physicists: Intro Physics for Life Sciences

University Physics for the Physical and Life Sciences utilizes six key features to help students learn the principle concepts of university physics:

- A seamless blend of physics and physiology with interesting examples of physics in students' lives,
- A strong focus on developing problem-solving skills (Set Up, Solve, and Reflect problem-

Physics for the Life Sciences, 3rd edition, by Martin Zinke-Allmang, Ken Sills, Reza Nejat, and Eduardo Galiano-Riveros brings the beauty of physics to life. Taking an algebra-based approach with the selective use of calculus, this text provides a concise approach to basic physics concepts using a fresh layout and many conceptual examples.

Almost all areas of modern life sciences integrally involve physics in both experimental techniques and in basic understanding of structure and function. Physics of the Life Sciences is not a watered-down, algebra-based engineering physics book with sections on relevant biomedical topics added as an afterthought.
