Drawing on a data set of 696 documents – competition and state aid judgments, orders and opinions of the European Courts, and Advocates' General opinions referring to various soft law instruments – this detailed textual and doctrinal analysis investigates the way in which the EU Courts deal with soft law, how the normative status of these instruments is acknowledged, and how their effects are recognized. It reveals that several –champion– instruments feature frequently in the case law: the guidelines on fines and the leniency notice in competition law, the state aid instruments on aid to be granted to enterprises in difficulty, regional aid, de minimis aid, and aid to be granted to SMEs – all of them having in common the fact that they regulate highly litigated areas. The analysis treats issues such as the following: ; the pathway from judicial ignorance to judicial acknowledgement of soft law; ; the judicial creation of legal –hybrids–; the judicial review of soft law; the potential use of soft law as a –sword– or as a –shield– in a court of law; the distinction between legally binding force and legal effects; how soft law can produce legal effects through the operation of general principles of law such as legitimate expectations, legal certainty, or human rights; and how the Courts locate soft law on a strong constitutional pluralist background. Although the analysis might appear to relate to a fairly narrow spectrum of EU law, in fact the interaction of soft law and legal principles reaches into many diverse areas of law, and increasingly so in the twenty-first century. Consequently, this ground-breaking book will prove immeasurably valuable to any practitioner, academic, or policymaker interested in how the EU Court is fulfilling once again its constitutionalizing role, even in an area traditionally lacking formalism and conventions: that of soft instruments of governance.

The 'corporate social responsibility' ('CSR') movement has been described as one of the most important social movements of our time. This book looks at what the CSR movement means for multinationals, for states and for international law. International law is often criticized for being too 'state-centred', and ill-equipped to deal with the challenges of globalization. However, drawing from many and varied examples of state, NGO and corporate practice, this 2006 book argues that, while international law has its limitations, it presents more opportunities for the CSR regulation of multinationals than many people assume. The main obstacles to better regulation are, therefore, not legal, but political.

Containing case studies and research findings, this book deals with methods and tools suitable for designing, managing, and controlling

processes within the supply chain. The authors are leading experts within the international community in the field of production management.

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

CIMA Official Learning Systems are the only textbooks recommended by CIMA as core reading. Written by the CIMA examiners, markers and lecturers, they specifically prepare students to pass the CIMA exams first time. Fully updated to reflect the 2010 syllabus, they are crammed with features to reinforce learning, including: - step by step coverage directly linked to CIMA's learning outcomes - fully revised examples and case studies - extensive question practice to test knowledge and understanding - integrated readings to increase understanding of key theory - colour used throughout to aid navigation * The Official Learning systems are the only study materials endorsed by CIMA * Key sections written by former examiners for the most accurate, up-to-date guidance towards exam success * Complete integrated package incorporating syllabus guidance, full text, recommended articles, revision guides and extensive question practice

A reference for chemists, toxicologists, laboratory technicians, manufacturers, safety professionals, emergency first responders, and lawyers, this international directory of 51 major countries, provides more than 7,500 entries of hazardous chemical manufacturers, organizations, government agencies, hotlines, and useful Web sites for software and databases around the world.
