The aim of this book is to help students write mathematics better. Throughout it are large exercise sets well-integrated with the text and varying appropriately from easy to hard. Basic issues are treated, and attention is given to small issues like not placing a mathematical symbol directly after a punctuation mark. And it provides many examples of what students should think and what they should write and how these two are often not the same.

Characteristics of hidrologic phenomena; Random variables and their distributions; Various probability topics applied to hydrology; Statistics and hydrology; Empirical distributions of hidrologic variables; Parameters and order-statistics as descriptors of distributions; Probability distribution functions in hydrology; Estimation methods; Sampling Theory; Testing hypotheses and goodness of fit; Correlation and regression; Multivariate analysis.

This book is an anthology of critical reviews in business management which is taught in both levels, the undergraduate and the graduate level courses. Throughout the book Dr. Milad intended to tackle the crucial concepts that his management students have touched. Additionally, Dr. Milad followed closely the APA formatting, but occasionally, he was not restricted by its rules.
