When a disturbed young Russian man came to Freud for treatment, the analysis of his childhood neuroses(most notably a dream about wolves outside his bedroom window)eventually revealed a deep-seated trauma. It took more than four years to treat him, and "The Wolfman" became one of Freud's most famous cases. This volume also contains the case histories of a boy's fear of horses and the Ratman's violent fear of rats, as well as the essay "Some Character Types," in which Freud draws on the work of Shakespeare, Ibsen, and Nietzsche to demonstrate different kinds of resistance to therapy. Above all, the case histories show us Freud at work, in his own words.

What love is, why love is born, why it sometimes grows, and why it sometimes dies. Have you ever wondered how romantic love evolves? What the difference is between mature and immature love? What role sex plays in romantic love, and whether love necessarily implies sexual exclusivity? And, most important, how can we make love last? Originally published in 1980, this updated edition of The Psychology of Romantic Love explores the nature of romantic love on many levels—the philosophical, the historical, the sociological, and the physiological. Nathaniel Branden explains why so many people say that romantic love is just not possible in today's world and—drawing on his experience with thousands of couples—finds that such love is still a possibility for anyone who understands its essence and is willing to accept its challenges. Branden sees it as a pathway not only to extraordinary joy but also to profound self-discovery. His vision of love is thoroughly appropriate to our time and grounded in our humanness.

'Psychoanalytic treatment utilised the patient's capacity to love and desire as a means to an end. The stuff of romance became the stuff of cure. When Freud is writing about technique in psychoanalysis - and these papers [in *Wild Analysis*] represent his most significant contributions to the subject over three decades of work - it is important to remember that he is talking about what a couple, an analyst and a so-called patient, can do in a room together. For better or worse.' Adam Phillips

An extraordinary collection of thematically linked essays, including THE UNCANNY, SCREEN MEMORIES and FAMILY ROMANCES. Leonardo da Vinci fascinated Freud primarily because he was keen to know why his personality was so incomprehensible to his contemporaries. In this probing biographical essay he deconstructs both da Vinci's character and the nature of his genius. As ever, many of his exploratory avenues lead to the subject's sexuality - why did da Vinci depict the naked human body the way he did? What of his tendency to surround himself with handsome young boys that he took on as his pupils? Intriguing, thought-provoking and often contentious, this volume contains some of Freud's best writing.
